### **Size, placement and font type**

Any use of the PER.C6<sup>®</sup> logo and/or word mark should meet the following conditions:

- The word mark PER.C6<sup>®</sup> should only be written in capital letters and, except if written out in text, always be written in the Verdana font type.
- Always ensure that any adjustments in size of the logo are made proportionally, so that the overall impression of the PER.C6<sup>®</sup> logo is not distorted.
- You may vary the size of the PER.C6<sup>®</sup> logo to suit your needs but the minimum size of the logo is 2 centimeters in height to ensure legibility. The minimum distance allowed between the logo and any other element (graphic, type or edge of page) is half the height of the logo with a minimum of 1 centimeter.
- Be sure to keep the PER.C6<sup>®</sup> logo intact as it currently exists and use it as a whole. Do not use some portions of the PER.C6<sup>®</sup> logo while leaving other parts out.
- The PER.C6<sup>®</sup> logo is a registered trade mark. The registered symbol “®” should be placed just of the right side of the logo. If the symbol is used in text, it should directly follow the mark.
- The ® symbol can be put into superscript, smaller, raised form, but should appear large enough that it is discernible by the naked eye.
- The PER.C6<sup>®</sup> logo and word mark should always be used in a manner that will distinguish it from other common words and that will clearly indicate the source and the quality of the goods or services.
- When two or more company trademarks appear in the same advertisement, or on the same label, packaging or carton, The PER.C6<sup>®</sup> logo and/or word mark should be clearly separated as two different trademarks. Failure to clearly separate them could mislead the public into believing, for example, that the second trademark is the generic name of the product.
